PERSONAL PROJECTS

Chat App

- Built a chat app for mobile devices using React Native.
- Created a page displaying the conversation, as well as an input field and submit button.
- The chat provides users with communication features: sending images and location data.
- Data gets stored online and offline.

Meet App

- Built a serverless Progressive Web Application created using React and a Test Driven Development approach.
- Implemented PWA and Serverless concepts that provides offline support, instant loading, responsive design and cross-platform compatibility.
